

VEHICLE ASSEMBLY

We create value add for our customers by reshaping the way things are produced.

We combine our specialized technology competences and profound industrial understanding to meet your customers' needs.

We offer attractive manufacturing capabilities, we have the willingness and ability to shape the technology and industry offering, and a wide range of products to be the preferred Tier 0.5 partner.

Respect, Simplicity and Speed are our values that drive us to find the right solutions for the future of our customers' businesses.

REDUCE COMPLEXITY OF YOUR SUPPLY CHAIN

Fortaco Vehicle Assembly supports off-highway customers to focus on the most vital parts of their operations by handling partly or completely their manufacturing processes. We are committed to safety and quality with the strive to reduce complexity in supply chain.

System integrator

Fortaco provides with a full range of services for our customers starting from the basic assembly labor content to sourcing and purchasing service, including all related logistics handling, where Fortaco can take material responsibility from our customers. In addition, Fortaco Technology provides engineering services starting from concept design phase up to final assembly and testing with the full pre-dispatch inspection to assure the highest quality standards and direct shipment to our customers' distribution network or even end customers.

Operational Excellence

The frame is the foundation for each protection system and cabin structure. Therefore, we put the highest priority on safety without compromise. Intelligent concepts for doors and windows that allow optimum visibility are the elements to safe operation. Comfortable and ergonomic cabin interior assures easy handling and drivability of the cabin, resulting in lower operator fatigue. Fortaco offers applications and solutions for cabin interior concepts as well as switches, joysticks, pedal systems and comfort elements like arm rests, fans, sun blinds, stereos and more.

Our 20 years of cooperation has always been smooth with Fortaco in our ever changing business. Our needs are demanding and products of very high quality when used in tough environments, like mining. It's crucial we can react fast to volume changes. With the right attitude on both sides of the table you can concentrate on the value-creation."

Master of flexibility

In outsourcing cases, Fortaco will take the full ownership of customers' manufacturing processes, allowing our customers focusing on their core business. Service level varies from the outsourcing of smaller non-core production volumes even to the full outsourcing of defined operations. Global customers lacking European production setup, can find us as a reliable partner, offering asset light services without major investments into the manufacturing footprint. Today, our customers represent the wide range of off-highway industries, like agriculture and forestry, mining, material handling, construction, defense and heavy transportation.

Mats Eriksson

President

Load and Haul, Sandvik

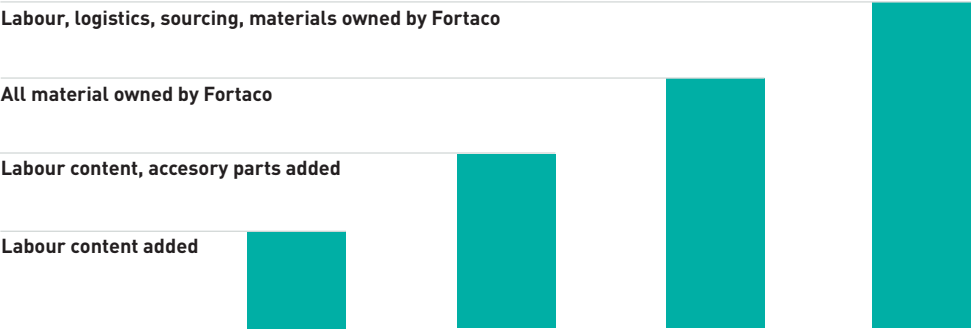

At Fortbrand, we want to offer our clients the best of quality. For this reason we value trustworthy partnerships. Fortaco’s solid expertise in assembly and the wide network of subcontractors guarantee the quality of components as well as timely deliveries and competitive costs.”

Veikko Möttönen
Director of international Sales
Fortbrand Services Inc.

Fortaco’s offering in Vehicle Assembly includes a broad range of vehicle assembly services for the off-highway industry from the module assemblies to the complete units. We have four value levels for our customers.

Fortaco is the leading full-solution provider for OEMs in the off-highway equipment industries. Pioneering the design and production of assemblies, cabins, steel fabrications, and zero emission solutions, we offer cutting-edge technology for enhanced productivity. We empower off-highway machines to use fossil-free steel and our customers to optimize their operations and move towards a greener future.

Collaborating with industry-leading OEMs, we specialize in full lifecycle solutions from research and technology to the design and production of their components and machines. Our innovative technologies extend to lightweight design, ensuring efficiency without compromising on durability and functionality.

We have operations in multiple business sites which enable flexible and reliable support for our customers.
