MauserCABS

TATA AUTOCOMP

Together with our premium brands, Buisard - Fortaco - MauserCABS - Tata AutoComp, we offer high-quality vehicle cabins and technology development to the off-highway equipment OEMs worldwide.

We are committed to safety, quality, and on-time deliveries with the strive to reduce complexity in the supply chain.

We have the willingness and ability to shape the industry offering and technologies to be the preferred Tier 0.5 partner.

With more than 80 years of experience in safety cabins, we are one of the leading, most experienced, and reliable operator cabin manufacturers in Europe and India.

Austria • Finland • France • India • Slovakia

DESIGN & MANUFACTURING

Fortaco has five vehicle cabin business sites located in Austria, Finland, France, India and Slovakia. In Europe, we are one of the largest vehicle cabin manufacturers and in Pune, we design and manufacture safety cabins for the Indian and Asian markets. With our premium brands, we provide the best-in-class services and vehicle cabins to our global OEM (Original Equipment Manufacturer) customers. We are focusing on quality, delivery performance, and productivity in manufacturing operations.

Vehicle cabin offering

Our cabin offering range from completely assembled plug & play vehicle cabins to high-volume operator cabins. Serial manufacturing with flexible cabin content is an important part of offering. With a variety of cabin design and product knowledge we serve several industrial sectors like agriculture, construction equipment, container handling, defence, forestry, marine & energy, material handling, mining, and recycling.

Cabin technology

Our cabin technology teams in Austria, Finland, France, India and Slovakia support customers during various phases of product lifecycle, in product development, and new product implementation with design concepts, engineered solutions, industrialization, and customized manufacturing services. We provide optimized design and manufacturing solutions and complete project handling.

Aftermarket services

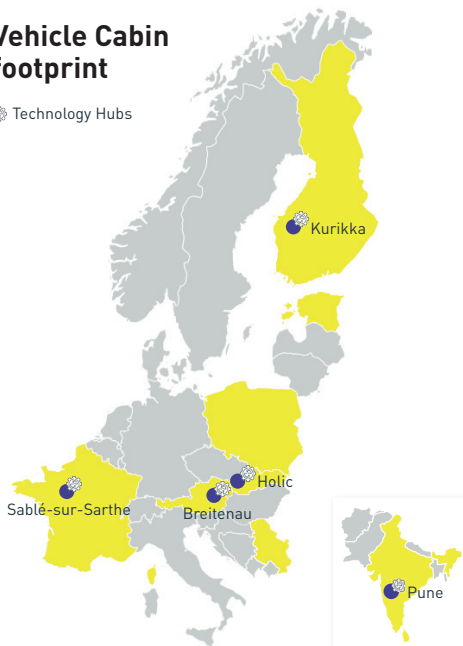

We provide aftermarket services for spare parts during the lifecycle of a cabin and at least 10 years after the end of production. We manufacture injection moulded parts in-house, you can get specially developed and manufactured items for the hard use of vehicle cabins for the off-highway machines from us. In addition to fully equipped cabins, we also produce doors for forklifts.

Modern manufacturing

We support customers on product design and manufacturability to ensure the most efficient manufacturing processes with the right quality and the right price. This makes us a genuine manufacturing partner from design-to-manufacturing, including sourcing, inspection and testing, and deliveries to the final destination. Our cabin factories are equipped with the best-in-class machinery and we have a high degree of automated manufacturing and advanced robot welding lines.

WHY CHOOSE FORTACO

- Full design and R&D capabilities inhouse.
- All-inclusive cabin portfolio from glazed cabins to full plug & play cabins.
- Initial design concepts up to serial production.
- Project process adapted to customer’s needs.
- Flexible, reliable, and agile business partner.
- Over 80 years of experience in vehicle cabin development.
- Application know-how and long experience in fully assembled vehicles help us create solutions that improve customers’ productivity.

Fortaco is the leading full-solution provider for OEMs in the off-highway equipment industries. Pioneering the design and production of assemblies, cabins, steel fabrications, and zero emission solutions, we offer cutting-edge technology for enhanced productivity. We empower off-highway machines to use fossil-free steel and our customers to optimize their operations and move towards a greener future.

Collaborating with industry-leading OEMs, we specialize in full lifecycle solutions from research and technology to the design and production of their components and machines. Our innovative technologies extend to lightweight design, ensuring efficiency without compromising on durability and functionality.

We have operations in multiple business sites which enable flexible and reliable support for our customers.
