

**THIS IS  
FORTACO**

# FORTACO - GLOBAL STRATEGIC PARTNER

**Fortaco is a strategic** Tier 0.5 partner for leading OEMs in the off-highway equipment industry. Fortaco's comprehensive offering combines engineering expertise, advanced manufacturing capabilities, and a worldwide footprint designed to follow our customers going global.

## INDUSTRIES SERVED

Fortaco has a large portfolio of global customers. We serve more than 60 industry-leading OEM customers in the segments like: Agriculture Construction Equipment • Container Handling Defense • Forestry • Material Handling Mining • Municipal • Recycling

### Business Sites

# FORTACO OFFERINGS

## Technology

Fortaco is actively driving the green environmental transformation, and one of our strategic targets is to transform the off-highway equipment industry toward an emission-free future. To prioritize and accelerate this shift, Fortaco is developing future business offerings, including low-emission steel, lightweight design, integrated thermal management. By integrating sustainable materials into our processes, we help OEMs achieve their sustainability goals with verifiable data and real results. Fortaco aims to be a circular economy enabler in 2030.

## Assemblies

Fortaco simplifies supply chain complexity by mitigating fluctuations in demand, managing capacity constraints, reducing time to market, and lowering fixed costs and tied up capital. Fortaco's flexible assembly offerings include complete vehicle assemblies, module assemblies, cabin assemblies and assembled systems, including automation, mechanical, hydraulic, pneumatic, and electrical assemblies. Fortaco provides lifetime service and after sales services for spare parts.

## Cabins

Fortaco's cabin offerings range from fully assembled plug & play cabins to high-volume operator cabins. Serial manufacturing with flexible cabin content is an important part of cabin offering. The Cabin Technology team provides product development and new product implementation services: design concepts, engineering solutions, industrialization, and customized manufacturing. Fortaco also provides aftermarket services for spare parts during the life-cycle of a cabin.

## Defense

Fortaco combines engineering know-how, manufacturing excellence and system technology in the Defense segment. Our range of applications includes module assemblies and steel fabrications, such as complete small and large welded structures, chassis, frames, and bodies. For cabins, Fortaco offers a fully integrated solution that combines cabin hardware with customer-specific applications and control systems. The NATO quality standard for defense-sector suppliers has been granted to the Business Site Kurikka, which meets the requirements of NATO AQAP-2110 certification.

## Steel Fabrications

Fortaco's steel fabrications are built for durability and strength, performing reliably in demanding conditions. Our offerings include welded steel components such as complete frames, booms, and various types of structures. We continuously improve our welding processes and procedures (WPQR, WPS). Our expertise covers commercial and high-strength steel - from S235 up to S1100QL - including wear-resistant steel. We also provide cut and processed steel parts produced with state-of-the-art equipment.

## WHY FORTACO?

**Our commitment** to safety, quality and delivery accuracy guides everything we do.

**We support** the green transition and aim to transform the off-highway equipment industry emissions-free.

**Sustainability** drives our operations, from energy-efficient production to eco-friendly materials.

**We are improving sustainability** throughout the value chain. We are not only compliant with current regulations but also work with customers and suppliers to enhance our impact on people and the planet throughout the value chain.

### 80+

Welding robots

### 60.000+

Tons of steel annually

### 50+

CNC centres

### 2500+

Employees

### 348+

Net sales MEUR

**Fortaco is the leading** full-solution provider for OEMs in the off-highway equipment industries. Pioneering the design and production of assemblies, cabins, steel fabrications, we offer cutting-edge technology for enhanced productivity. We empower off-highway machines to use low-emission steel and our customers to optimize their operations and move towards a greener future.

**Collaborating with industry-leading OEMs**, we specialize in full lifecycle solutions from research and technology to the design and production of components and machines. Fortaco's innovative technologies extend to lightweight design, ensuring efficiency without compromising on durability and functionality.

**We have operations** in multiple business sites which enable flexible and reliable support for our customers.

**Professional people** are our asset. We develop our people and leaders based on the Fortaco Values of respect, simplicity and speed.
